

In the landing sites, there are several applications that support our enumerators and suppliers in collecting data. Such as the I-Fish apps and the I-Fish system.

A. I-Fish Apps

I-Fish mobile apps used by MDPI's enumerators to collect port sampling data. This apps replaces the paper and spreadsheet files in field. Designed to operate in offline and online mode.

B. I-Fish System

I-Fish is an advanced data platform for compiling, transferring and reporting fisheries information throughout Indonesia
